

Pan-International Industrial Corp. April 2026 Revenue Briefing

Pan-International Industrial Corp. (TWSE: 2328) today announced its unaudited consolidated revenue for April 2026, totaling NT\$1.736 billion. This figure represents a month-on-month (MoM) increase of 15.05% and a year-on-year (YoY) decrease of 16.55%. Cumulative consolidated revenue for January through April 2026 reached NT\$5.969 billion, reflecting a 23.42% decline compared to the same period in 2025.

In April, revenue continued to grow, driven by the gradual commencement of shipments for new business orders in the AI and robotics sectors. During the same period last year, revenue reached a higher baseline due to strong shipment momentum from consumer electronics product launches. This year, however, cumulative year-on-year revenue still shows a decline as orders from existing customers have yet to pick up. Looking ahead to the second quarter, the company will actively implement shipment plans for AI server and robotics-related products while pursuing new orders from consumer and automotive clients, with the goal of progressively increasing monthly revenue.

To navigate current market challenges, the company is actively pursuing orders in the AI server segment to bolster revenue growth. Concurrently, our core strategic objective remains profitability optimization. We are committed to penetrating the high-end product lines of existing clients and increasing the revenue contribution from high-margin product categories. Furthermore, we are strategically positioning ourselves in the humanoid robotics market. Leveraging our deep expertise and proven track record in cables and wire harnesses, we aim

to expand into critical components for humanoid robots, establishing a new growth engine for both top-line revenue and bottom-line profitability.
