Pan-International Industrial Corp. July 2026 Revenue Briefing

Pan-International Industrial Corp. (TWSE: 2328) today announced its unaudited consolidated revenue for July 2026, totaling NT$2.050 billion. This figure represents a month-on-month (MoM) increase of 4.62% and a year-on-year (YoY) increase of 16.37%. Cumulative consolidated revenue for January through July 2026 reached NT$11.679 billion, reflecting a 11.61% decline compared to the same period in 2025.

Starting in July, the company entered its peak season, with revenue maintaining a growth trend driven by the gradual increase in pull-in momentum from ICT customers and contributions from new business shipments. In the same period last year, customer shipments declined due to the impact of US tariffs, resulting in a lower base and thus a larger year-over-year increase this year. On a cumulative basis, the year-over-year figure still showed a decline, as shipment volumes from existing customers remained below last year's levels; however, the rate of decline has been gradually narrowing. Looking ahead to the second half of the year, the company will actively implement its shipment plans for AI server and robotics-related products, and pursue new orders from consumer and automotive customers, in order to boost monthly revenue.

To navigate current market challenges, the company is actively pursuing orders in the AI server segment to bolster revenue growth. Concurrently, our core strategic objective remains profitability optimization. We are committed to penetrating the high-end product lines of existing clients and increasing the revenue contribution from high-margin product categories.

Furthermore, we are strategically positioning ourselves in the humanoid robotics market. Leveraging our deep expertise and proven track record in cables and wire harnesses, we aim to expand into critical components for humanoid robots, establishing a new growth engine for both top-line revenue and bottom-line profitability.
